DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-7, 9-12, 14-17, and 27-29 in the reply filed on January 24, 2011 is acknowledged. The traversal is on the grounds that the Examiner has not given any indication as to why a different search would be required for the two claim groupings. This is not found persuasive because the search for non-elected Group II, drawn to a method of manufacturing is exclusively limited to the process subclasses of Class 29, Metal Working, while the elected apparatus claims would be searches in Class 261, Gas and Liquid Contact Apparatus, the search for the apparatus being conducted without regard to the method of manufacture of the apparatus.

The requirement is still deemed proper and is therefore made FINAL.

Allowable Subject Matter

2. Claims 1-7, 9-12, 14-17, and 27-29 are allowed.

The prior art of record fails to disclose or suggest the dew-point cooler as recited by the independent claims wherein the heat exchange laminate comprises a formable carrier layer at least partially covered with a flexible liquid retaining layer having an open structure such that in use, a heat exchange medium can directly contact the carrier layer through the open structure of the liquid retaining layer.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

4. Applicant is encouraged to cancel the non-elected claims in response to this Office action so as to facilitate allowance of the application at the earliest possible time.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Bushey whose telephone number is 571 272-1153. The examiner can normally be reached on M-Th 6:30-5:00.
